PROFESSIONAL SUMMARY

Accomplished **Senior Fullstack .NET Software Engineer / Application Specialist** with **7+ years** of progressive experience architecting, developing, and scaling high-availability enterprise systems in **Healthcare Information Systems (HIS)**, **Commercial Banking (VIB, ACB)**, and **FinTech**. Extensive competence in **Microservices Architecture, Clean Architecture, and CQRS pattern** utilizing **.NET 8 / 9, ASP.NET Core Web API, ReactJS, PostgreSQL, and MS SQL Server**. Directly involved throughout the full engineering lifecycle: clinical and financial domain analysis, high-throughput RESTful API design, interactive SPA frontend development, and database query optimization under heavy transactional workloads. Proven track record collaborating in cross-functional squads of 20+ members (Developers, BAs, QCs, Medical Specialists, DevOps), driving UAT to successful production go-live under strict SLAs, and leveraging AI tools (Cursor, Copilot) to accelerate delivery velocity.

TECHNICAL EXPERTISE

Backend & Languages: C#, .NET 9 / 8 / 7 / 6, ASP.NET Core Web API, EF Core, LINQ, Dapper

Frontend & Web: ReactJS, JavaScript (ES6+), TypeScript, HTML5/CSS3, DevExpress, Bootstrap

Architecture & Design: Microservices, Clean / Onion Architecture, CQRS, RESTful APIs, OOP, SOLID

Cloud, DevOps & Tooling: Docker, CI/CD, Git, GitHub, GitLab, AWS S3, Postman, Swagger, Cursor AI, Copilot

Databases & Caching: MS SQL Server, PostgreSQL, Redis Distributed Caching, Query Tuning, Indexing

Security & Integration: OAuth2, JWT, mTLS, API Gateway, Third-Party Integration, Banking Compliance, VDI

Domains & Methodologies: Hospital Information Systems (HIS - Immunization, Pharmacy, Paraclinical), Commercial Banking (Max App, Sales Portal), FinTech, Agile / Scrum

WORK EXPERIENCE

Senior Fullstack .NET Engineer — VinSmartFuture

06/2026 – Present

Platform: Hospital Information & Operational System (HIS) | Architecture: Microservices (20+ Modules) | Role: Fullstack (.NET & ReactJS)

- **Enterprise Healthcare Microservices Architecture:** Co-architected and engineered fullstack microservices (.NET Core Web API + ReactJS) across an enterprise Hospital Information System (HIS) comprising 20+ specialized modules, ensuring high throughput, operational data consistency, and 24/7 uptime.
- **Core Clinical Modules Ownership (Immunization, Pharmacy, Paraclinical):** Delivered end-to-end fullstack features for 3 mission-critical hospital modules: automated vaccination schedule and batch tracking (Tiêm chủng); hospital dispensary, prescription validation, and real-time stock reconciliation (Dược); diagnostic order entry, lab test processing, and imaging examination workflows (Cận lâm sàng).
- **Fullstack Engineering (.NET Core & ReactJS):** Developed high-throughput RESTful Web APIs with ASP.NET Core and clean domain models; built responsive, ergonomic Single Page Application (SPA) screens using ReactJS, streamlining complex medical data entry and diagnostic tracking for healthcare personnel.
- **Domain Research & Clinical UAT Alignment:** Conducted in-depth domain analysis with Business Analysts (BAs); led and facilitated User Acceptance Testing (UAT) directly with clinical specialists and hospital operation teams to validate workflows against real-world hospital procedures.
- **Quality Engineering & Defect Prevention:** Partnered closely with QC engineers to establish comprehensive test cases, automate API validation, triage complex defect scenarios, and guarantee high-stability, zero-critical-bug production rollouts.

Senior Application Development Specialist — Vietnam International Bank (VIB)

2024 – 05/2026

Platforms: Max App, Sales Portal, CRM Integration (Salesforce, Bitrix24) | Team Size: ~25 members | Role: Senior Backend Developer

- **Mission-Critical Banking Systems:** Architected and developed backend microservices powering Max App and Sales Portal, supporting daily operational transactions for bank sales officers and retail banking customers.
- **CRM Integration & Migration (Bitrix24 to Salesforce):** Contributed directly to core CRM transformation for Max App from Bitrix24 to Salesforce; designed integration APIs and bidirectional data sync workflows, ensuring data consistency between banking core and Salesforce.
- **CQRS Architecture & Caching Optimization:** Engineered backend services following Clean Architecture and CQRS pattern; implemented Redis caching for high-frequency read operations to offload database query pressure during peak banking business hours.
- **24/7 Production Operations & RCA:** Provided 24/7 production on-call support; performed root-cause analysis (RCA) on system incidents, executed emergency troubleshooting, and deployed zero-downtime hotfixes adhering to strict banking change management and SLAs.
- **AI-Augmented Engineering Velocity:** Championed squad-wide adoption of AI development tools (Cursor, GitHub Copilot), establishing workflows for rapid feature scaffolding, automated unit testing, and technical documentation.

Senior .NET Developer / Solution Engineer — Asia Commercial Bank (ACB)

2022 – 2024

Projects: BMS, VMS, D-Sign, RPA, CCMS | Team Size: 10+ members | Role: Backend Engineer & Partner Integration

- **Internal Enterprise Banking Solutions:** Engineered core banking solutions supporting branch operations, including BMS (Branch Management System), VMS (Visitor Management System), and D-Sign (Digital Signature System), enabling digital approval workflows and streamlining counter operations nationwide.
- **Vendor & Third-Party Partner Integration:** Represented ACB engineering in technical discussions with external fintech partners and software vendors; evaluated architectural proposals, established API integration protocols, and enforced strict banking security standards.
- **Security Gatekeeping & VDI Permissions:** Governed partner onboarding workflows, audited external developer access permissions within isolated VDI environments, conducted rigorous code reviews, and supervised secure API gateway connectivity with internal systems.
- **Database Performance & Optimization:** Profiled and tuned complex stored procedures, relational table schemas, and indexing strategies on MS SQL Server, ensuring stable query performance for heavy branch operational reporting.
- **Go-Live Deployment & Quality Assurance:** Coordinated multi-system go-live releases, authored comprehensive Standard Operating Procedures (SOPs), and ensured seamless, zero-downtime deployments complying with banking audit regulations.

Software Engineer — THL One Corporation

2020 – 2022

Projects: Orbit (System Modernization), ISC (Factory Automation) | Tech: ASP.NET Core Web API, React, SQL Server, DevExpress

- **Legacy Monolith Modernization (Orbit):** Re-engineered a mission-critical legacy Visual Basic monolith into modern ASP.NET Core Web APIs and relational SQL Server databases, significantly improving system maintainability, extensibility, and operational stability.
- **Real-Time Production Tracking (ISC):** Built interactive factory-line monitoring dashboards using React and DevExpress, consuming backend APIs to track batch lifecycles, material status, and warehouse movements in real time.
- **Database Processing & Reporting:** Designed relational database schemas, authored automated T-SQL stored procedures, and scheduled batch jobs for daily plant audit and production throughput reports.

Software Engineer — AES Technologies

2019 – 2020

Projects: Stock Management System, E-Commerce App Admin (Gomistore), Company CRM | Tech: ASP.NET Core, MVC, EF Core, SQL Server

- **Backend API & Administration Portals:** Developed backend RESTful APIs and administration portals using ASP.NET Core / MVC and Entity Framework Core for inventory stocktaking, automated invoice generation, and CRM customer pipelines.
- **Automation & Background Services:** Implemented background worker services for automated batch invoice generation, low-stock inventory alerts, and mobile push notifications to active end-users.

EDUCATION & CERTIFICATIONS

Gia Dinh University

Bachelor of Engineering in Software Engineering (2015 – 2019)

Core: Software Architecture, Database Systems, Object-Oriented Analysis & Design (OOAD)

Agile Project Management in Banking

Project Management Institute (PMI) standards & Banking Certification

Certified in Agile/Scrum delivery, sprint planning, and cross-functional engineering execution
